Team

Helene Chambaut

Location

Angers | France

Summary

Wellcome to the livestock applied research organisation in France call l'Institut de l'Elevage".

Our national association is dealing with beef and dairy cattle, sheep, goat, horse breeding. We are working on technical, économiical and environmental issues. We produce references and tools to help farmers changing their practices into a sustainable and environmental freindly way.

If you want to know more about our activity, in Europe and world wide, please refer to our website. There are a lot of informations, free open acces. Here is the adress <http://idele.fr/>

Within this Green week and 4 for 1000 initiative I only focus on climat topic!

Please to meet you soon,

Hélène Chambaut- Institut de l'élevage-Angers, France

Presentation

What are you interested in?

You can discover the **CAP2ER** Tool which is used on a large number of farms in France to advice on climate warming but also water and air quality. It estimates services on biodiversity and human nutrition fonction (number of person feed, based on protein covering needs)

You can discover how a new model is developped in **Carsolel** research project to easily estimate impact of new practices on soil organic carbone change. With this tool, you are able to integrate farmers grassland management effect on different soil types for C sequestration.

At last, if you want to discover how to valorise new practices 'climate freindly' in a labelling approach, please refer to **CARBON AGRI** presentation.
