Summary

Business Climate Leaders is an initiative of Citizen Climate Lobby. Our over 200,000 volunteers are engaging Members of the US Congress to promote the Energy Innovations and Carbon Dividend Act, placing a fee on carbon at the source. We also support other bi-partisan legislation, such as the Growing Climate Solutions Act, which supports carbon markets paying farmers to sequester carbon into soil on a per ton basis.

Videos

The primary focus of Business Climate Leaders, an initiative of Citizen Climate Lobby, is to promote the Energy Innovations and Carbon Dividend Act. It taxes fossil fuels at the well, and distributes the revenue back to the public in form of a dividend.

The Food and Agriculture Action Team is hosting webinars to promote specific bi-partisan climate change related legislation, such as this event focused on the Growing Climate Solutions Act.

More

Please join us for a panel discussion titled "Soil Carbon Sequestration - A Systems Perspective" scheduled for May 18. We will discuss the true potential of agriculture to not just reduce its own emissions, but also add to that the sequestration potential. Combined there is no other sector of the economy to match the potential to impact climate change; but it will require changing our food and agriculture systems, our menus, and the entire food supply chain.
