Team

David Morrison
William Ouellette

Location

Brussels | Belgium

Summary

At SoilWatch, we believe in empowering communities to create their own solutions in the climate emergency. Adapting to climate change, preventing desertification and enhancing food security aren't separate paths in development, but come together in the soil. By applying remote sensing technology and machine learning, we are able to provide up to date, reliable and low cost soil carbon measurements and develop verified carbon removal projects in North and East Africa. These projects not only remove CO₂ from the atmosphere, but mitigate conflict and food insecurity in the most vulnerable areas where our team has direct on the ground experience.
