## Location

Timburi - São Paulo | Brazil

## Summary

#### **PRETATERRA - AT THE FOREFRONT OF AGROFORESTRY!**

We develop replicable designs of regenerative agroforestry systems, combining scientific data, empirical information and traditional knowledge with technological innovations, building a new productive paradigm that is sustainable, resilient and long-lasting.

In order to make large-scale agroforestry systems viable, while maintaining their complexity, it is necessary to structure information and data, automate design, sistematize inputs and standardize field operations. PRETATERRA designs integrated systems within this scope, assisting from diagnosis and planning, to the implementation, conduction and management of integrated production systems. Other surveys, diagnostics, inventories and records are part of our portfolio.

**If you are here, you share our vision in the search for a productive and integrative system based on biodiversity that is also dynamic and resilient.**

**So, let's keep in touch for partnerships!**

**PLEASE LEAVE US A MESSAGE BELOW OR E-MAIL US AT:
