Antonio Teixeira

Julia Lopes

Rafaela Guio

Location

Uberaba, Brazil

Summary

Soil Environmental Accounting is understood as the annual measurement and recording of physical, chemical and biological parameters of the soil that point out the consequences of the production system used, in the degradation/intoxication or in the recovery/detoxification of that agroecosystem, as well as the environment as a whole, including people. The project started in 2018 and has a long term. Our goal is to recognize and remunerate food producers that have good soil environmental accounting indicators.

More

Founded in 2018, IBA - Brazilian Institute of Agroecology is a non-profit association of private law. Our goal is to promote the construction and development of technical-practical models for food production, compatible with human and environmental values, and with society's wishes for more health and quality of life. Stay connected with us. Follow us on Instagram and Facebook (/ib.agroecologia), LinkedIn (/company/ib-agroecologia), YouTube (/agroecociencia) and visit our website (www.iba.agr.br).

Meet the team

During the indicated periods, one of the team members is available for a video chat.
