## Exhibitor

AGROVAR CC

<https://agrovar.bg/en/>

## Team

Konstantin Haralampiev

Boris Koev

Kristiyan Panayotov

## Location

Russe | Bulgaria

## Summary

## **The AgroVAR mission**

Our mission is to combine the power of sustainable agriculture and digital technologies to help farmers improve soil health, farm profitability and product quality.

**Companies that are disruptors in their industries and are breaking the status quo of standard business models are born out of a need for change. Changing end goals, changing development tools and focusing on solving specific problems.**

For years, we have watched climate change and conventional practices slowly push farmers towards soil fertility loss and uncertainty.

We created "AGROVAR" with the clear awareness that we need to change this direction. We believe that the protection and improvement of soil resources is the essential tool that Agriculture needs in order to be able to deal with the Climate related problems that have been looming over us for several decades.

The focus points of "AGROVAR" are:

### **Increasing carbon levels and important elements in the soil:**

Enhancing the level of biological activity

### **Healthier crops:**

Increased resistance to drought, cold, pests and abrupt climate change

### **Higher quality produce :**

Lower levels of chemical residues

Nutrient-rich crops and produce

### **Conservation practices:**

Better biodiversity

Individual context

Complex approach

## **Presentation**

pdf

## **Images**

**No images found!**

Couldn't find any images to display. Attach some images to this page or search for images by label or page.

Depending on the size of your Confluence instance, you may also want to refresh the page, as it may take some time until the images appear.
